PROJECTS

Kiva.org
CLONE OF A NON-PROFIT FIGHTING POVERTY WORLDWIDE

Facilitates funding loans to entrepreneurs in third world countries.

A full-stack application using React, Redux, Moment.js, Semantic UI, Stripe, and GoogleMaps for the front-end

The back-end was implemented utilizing Node.js, Express.js, Massive.js, and PostgreSQL

The database was populated with loans from Kiva's open API

Hunger Games
A LUNCH ROULETTE APP FOR FRIENDS AND COWORKERS

Randomly chooses a friend/coworker from the list then randomly chooses a venue from the list

The winner pays for everyone's lunch at the given venue

Built using React, Redux, GoogleMaps and custom css for the front-end. The back-end utilized the FourSquare API and an IP address locating API
